

ALIREZA REISI

DESKTOP & BACKEND DEVELOPER

Tehran, Iran • 09015349943 • alireza.reisi.minab@gmail.com
GitHub: github.com/Alirezareis • **LinkedIn:** linkedin.com/in/alireza-reisi-880284373

TECHNICAL SKILLS

LANGUAGES

C++, Python, C#

FRAMEWORKS

Qt Framework, FastAPI

DATABASES

PostgreSQL, SQL, NoSQL

TOOLS

Docker, Git, Linux, CMake, Visual Studio

CONCEPTS

OOP, Data Structures, Algorithms, REST APIs, Multithreading, Model/View Architecture

EDUCATION

M.S. in Computer Engineering

University of Hormozgan
Sep 2025 – Present

B.S. in Computer Engineering

Shahid Rajaei University
Sep 2021 – Sep 2025

LANGUAGES

Persian: Native
English: Fluent / Professional

PROFESSIONAL SUMMARY

Computer Engineering graduate specializing in C++/Qt desktop applications and Python/FastAPI backend development. Experienced in designing cross-platform desktop software, building optimized REST APIs, modeling PostgreSQL databases, and managing Dockerized environments. Seeking a Software Engineer role focused on desktop, backend, or systems development.

PROFESSIONAL EXPERIENCE

Backend Developer

B2B eCommerce Application | Remote | Sep 2025 – Present

- Architected and implemented a high-throughput RESTful backend API from scratch utilizing **Python and FastAPI**.
- Designed PostgreSQL database schema supporting inventory and payment workflows with indexed queries for faster response times.
- Implemented core backend components, including secure role-based JWT authentication and asynchronous endpoint loops for payment verification.
- Containerized application dependencies and deployment services via **Docker** to maintain continuous environment parity between local staging and testing systems.

C++ Developer Intern

DanialMoj Company | Tehran, Iran | Mar 2023 – Aug 2023

- Contributed to the development cycle of an enterprise desktop application built with native **C++ and the Qt framework (Qt Widgets)** using **CMake**.
- Programmed modular UI display widgets and components, binding application data structures using the standard Qt **Model/View Architecture**.
- Identified and resolved memory leaks and threading bottlenecks in the desktop client using application profiling and Visual Studio debugging tools.
- Managed codebase iterations, peer reviews, and branching strategies actively using **Git**.
